We are Centric IT Solutions Lithuania, a brand-new Kaunas-based division of Centric BV, one of the largest IT companies in the Netherlands, with offices in 9 European countries. We know that today the world is governed by those who control the data and are able to understand it. That is why we build IT solutions in collaborative teams - from the Cloud platform, DevOps engineers, Security Engineers to Data engineering and Quantitative data analysts and scientists.

We are planning to employ 250 people in Kaunas branch within next three years - all of them will be welcomed by the 4,300 members of the Centric family.

*Only selected candidates will be contacted.
